This document describes how you can access the EECS servers that you would need to accomplish your lab assignments.

## Option 1

Go to Sloan 353W and work at the thin clients located there.

## Option 2

Remote access

- 1. Download <u>NXClient for Windows</u> (or <u>Mac</u>) and install it.
- 2. Configure NXClient. Steps shown below are for the Windows version.

III NX			
NOMACHINE			EECS user id
Login Password	jmuray		
Session	ee434		Session name
Configure			Configure

III NX - ee434	
NOMACHINE	
General Advanced Services Environment About	Enter server name
Host ee434-466.eecs.wsu.edu Fort  22	
Desktop	Enter desktop type
Unix GNOME Settings	
Display Available area ▼ W 800 ★ H 600 ★ Use custom settings Settings	
Spread over multiple monitors	
Delete Save Cancel
