Concurrent Programming
Lecture 26

18th December 2002

Due to illness of the instructor, no lecture today.

Course evaluations in-class today. If you missed the evaluation and would like to participate let me know. I'll find out how you can get the forms and return them confidentially.

Presentations next week

Tuesday	Thursday
Thor	Andy&Ty
Knut-Helge	Harald
Joey	Eivind
Ryan	Matt
Sean&Chris	Lee
Hao	Mark
Bedirhan	Ryan
Yingxia	

We will have the computer projector available if you want to use it. The network connection in the room is outside the EECS firewall so make sure you put your presentation in a place it can be reached, for example in ~yourlogin/public_html. I don't know if the laptop that accompanies the projector has a floppy drive; my laptop does not, but it does have a CD drive.

Please practice your presentation and make sure that you can fit it in 10 minutes. Given the number of presentations I will be brutal on this point.

Final exam:

The final exam is Thursday, Dec. 19th, 10:10-12:10 in this room. The exam will be comprehensive, though with greater weight given to the latter part of the course.

To repeat what I said at the end of class last time – you may skip the final and take instead 80% of your midterm exam grade as your final exam grade.
