# CptS 111

February 27, 2023

Announcements

- Get started on PA 4 so you can ask questions in a timely manner; grading rubric available on Canvas

- Submit PA 4 as often as needed; only last version graded (by your TA). Can submit with penalty through Monday, 3.13.23. Not accepted after 3.13.23.

- Send email if you do a zyLab_PA late, so I can manually add a grade

- Exam 1, Q12: Answer should be True

- Must leave office hour at 3:45 pm today and Wednesday

- Questions?

The function `main()` never has any parameters and should not include a `return` statement.

A. True

B. False

C. Neither of the above

The best way to write a program is to develop it incrementally. First, write functions using function stubs, and after you know `main()` is correct, write the code for one function, check that it's correct, and then move on to code the next function.

A. True

B. False

What kind of error will you get with the following code:

```
def greet(name)
    print('Hello,', name)
    return
greet('SpongeBob')
```

A. runtime error

B. syntax error

C. logic error

D. None of the above

What kind of error will you get with the following code:

```
def triple(number):
        trip = number ** 3
        return number
tripled = triple(27)
```

A. runtime error

B. syntax error

C. logic error

D. None of the above
