- Questions?

```
>>> 'a' > 'A'
```

A. True

B. False

```
age = 17
citizen = True
if (age >= 18) and citizen:
    print('You can vote!')
else:
    print('Ineligible to vote.  Sorry.')
```

What will be printed?

A. You can vote!

B. Ineligible to vote. Sorry.

C. Neither of the above

```
rent = 2000
if 800 >= rent >= 400:
    print('Decent and affordable')
else:
    print('Too expensive')
```

What will be printed?

A. Decent and affordable

B. Too expensive

C. Neither of the above

Math operators have precedence over comparison operators, and comparison/relational operators have precedence over logical/Boolean operators.

A. True

B. False
